Install imDocShare App

KLapper Add-in for iManage

Bring Native AI Intelligence right inside iManage Work web!

- Ask natural-language questions and get intelligent answers based on: iManage workspaces, folders, and documents.
- Interact with AI directly inside the document preview window.
- Generate summaries, insights, and explanations without opening files.
- Generate documents using approved templates and boilerplate.
- Eliminate manual searching.
- User identity and permission context.
- Ask questions while reviewing documents.
- Create and save new documents inside iManage.
- Save directly back into the correct workspace and folder.
- Surface insights instantly instead of browsing folders or running keyword searches.

Why choose imDocShare?

Instantly provision Microsoft Teams and SharePoint.

Seamless iManage content integration(both sync and live-view).

Auto-sync client-centric content to SharePoint Extranets.

Create Teams with standardized templates and support for Shared Channels.

Enable bi-directional or one-way content sync with NetDocuments content.

Integrate with Microsoft Planner.

Surface iManage intelligence with imDocShare Agent in Microsoft Copilot.

Real-time (Both live & offline) Co-Authoring of iManage content in Microsoft Teams.

Key imDocShare Add-Ons

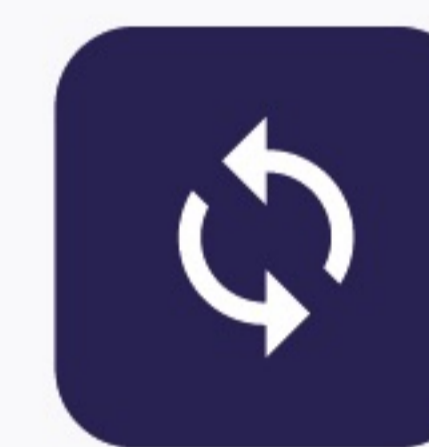

imDocShare One Teams App (Powered by Generative AI)

Access any iManage Work Server 10.2+ / iManage Cloud Content in Microsoft Teams as a personal app, Team Channel Post Tab, 1-1 Private Chat, and Teams Meeting.

imDocShare SharePoint app

Live-View, Add, Edit & Co-Author iManage Work content in Microsoft SharePoint and add imDocShare WebParts on SharePoint modern/classic pages.

imDocShare Sync app

Perform true bi-directional, metadata-aware, and permission-preserving (incl. Ethical Walls) synchronization across iManage, SharePoint, Teams, OneDrive, and Network Shares.

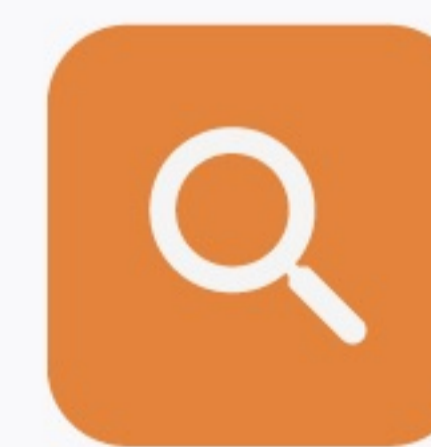

imDocShare Provisioning app

Bulk create, edit, update, and delete of Microsoft Teams, Channels, and Tabs, and SharePoint Client Extranet Sites, seamlessly integrated with NetDocuments.

imDocShare Co-Authoring app

Simultaneously Co-author Office (version 2013 or above) documents saved in iManage Work Server 10.2+ / iManage Cloud Content within Microsoft SharePoint & Microsoft Teams using Office Client like Word, and Excel.

imDocShare Hybrid Search app

Unified search experience across iManage Work Server 10.2+/iManage Cloud and SharePoint content from a single SharePoint interface.

imDocShare Attach app

Look up and link iManage documents to SharePoint List and Document Libraries.

imDocShare Content Browser app

Look up and reference any iManage content sources with your .NET, PHP, Java, or Full Stack web app.

imDocShare Admin app

Centrally manage and enforce imDocShare Settings, including enable/disable/default-value setup of imDocShare Configuration settings.
